#### DETAILED ACTION

#### Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 2-3, 5-6, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Courty et al. US 4,381,415.

Regarding claim 12, Courty '415 discloses a catalyst comprising delta alumina carrier (see column 3, lines 55-60), which would inherently correspond to a detectable amount.

Regarding claim 2, Convers '699 specifies the carrier selected from eta, gamma, chi, kappa, theta, delta, or rho alumina (see column 3, lines 55-60).

Regarding claim 3, Convers '699 discloses 0.05-0.6% copper and 0.1-1% potassium (see column 3, lines 34-38).

Regarding claims 5-6, Convers '699 discloses impregnation of the active elements on carrier (see column 3, lines 64-68) and copper chloride (see Example 3).

3. Claims 2-3, 5-6, and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Convers et al. US 4,460,699.

Application/Control Number: 09/847,298

Art Unit: 1754

Regarding claim 12, Convers '699 discloses an oxychlorination catalyst comprising a gamma, eta, or delta alumina carrier (see column 4, lines 51-61), which would inherently correspond to a detectable amount.

Regarding claim 2, Convers '699 discloses about 17.1% and 22.6% of the catalyst (see Examples 3-4).

Regarding claim 3, Convers '699 discloses 1-7 percent copper (see column 5, lines 25-26), lithium, sodium, potassium, rubidium, or cesium on a 0.05 to 1.0 molar basis relative to copper (see column 5, lines 29-35), and a surface area of 100-200 square meters per gram (see column 4, lines 62-66).

Regarding claims 5-6, Convers '699 discloses impregnating 1-7 percent copper (see column 5, lines 25-26 and Example 1), lithium, sodium, potassium, rubidium, or cesium on a 0.05 to 1.0 molar basis relative to copper using copper chloride (see column 5, lines 29-35 and Examples), and a surface area of 100-200 square meters per gram (see column 4, lines 62-66).

## Response to Arguments

4. Applicant's arguments filed 11/7/03 have been fully considered but they are not persuasive.

It is argued that neither reference anticipates... fluidized bed catalyst. This is not persuasive because oxychlorination catalysts are disclosed and, in any case, fluidized

Application/Control Number: 09/847,298

Art Unit: 1754

oxychlorination is merely an intended use. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See In re Casey, 152 USPQ 235 (CCPA 1967) and In re Otto, 136 USPQ 458, 459 (CCPA 1963). Applicant's apparent assertion that the claimed catalyst is different because of such recitations is also not persuasive because the disclosed particulate surface area is the same as Applicant's (see canceled original claim 4).

### Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS

of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward M. Johnson whose telephone number is 571-272-1352. The examiner can normally be reached on M-F 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stanley S. Silverman can be reached on 571-272-1358. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 571-272-0987.
